INTRODUCTION

The Saint Bernard is a giant among dogs; he is kind, gentle, loves children and is an excellent family pet. The Saint Bernard Club of America welcomes your interest in our breed.

The Breeder Advertisement section is provided as a convenience to anyone looking for a Saint Bernard. Members have paid a fee to be listed in this directory, have been SBCA members for at least five consecutive years, must have bred and/or owned a minimum of two champions, and have signed the SBCA's Guidelines and Statement of Policy which is shown below.

THE LISTING IN THIS DIRECTORY IS NOT TO BE CONSTRUED AS AN ENDORSEMENT BY THE SBCA.

The questionnaire is provided to offer each prospective puppy buyer a foundation for discussions with the breeder. Please also consider the information below and the information provided in our booklet, "Owning a Saint Bernard."

The Saint Bernard Club of America cannot guarantee the quality or health of puppies and/or breeding stock of the breeders listed within. The sale of a puppy or adult is a contract between the buyer and seller. The SBCA is not a party to that contract.

HEREDITARY DEFECTS

The following is a list of common hereditary defects found in Saint Bernards for which breeders should screen their dogs. Problems, however, are not limited to this list:

- **Hip and Elbow Dysplasia (buyers can search the OFA database at http://www.offa.org/)**
- **Entropian (see AKC Rules governing dog shows; dogs who have undergone corrective surgery CANNOT be shown)**
- **Epilepsy**
- **Bad Temperament**
- **Heart Defects**

The SBCA supports and encourages breeders to complete basic health screening tests for all breeding stock. Dogs meeting these basic health screening requirements will be issued Canine Health Information Center (CHIC) numbers. For potential puppy buyers, CHIC certification is a good indicator the breeder responsibly factors good health into their selection criteria. The following are the basic health screening recommendations for the Saint Bernard.

- **Hip Dysplasia - Min Age 24 Months** (One of the following) OFA Evaluation ↗
  PennHIP Evaluation (min age 24 months)
- Elbow Dysplasia - Min Age 24 Months
  OFA Evaluation ↗
- Eye Examination - Min Age 22 Months
  Eye Examination by a boarded ACVO Ophthalmologist ↗
- **Cardiac Evaluation - Min Age 24 Months** (One of the following) Congenital Cardiac Exam by Boarded Cardiologist ↗
  Advanced Cardiac Exam ↗
  Basic Cardiac Exam by Boarded Cardiologist ↗
- Degenerative Myelopathy
  DM DNA Test from an approved lab ↗
- **Autoimmune thyroiditis** (Optional but recommended) OFA evaluation from an approved laboratory ↗
